Hinged Casement Windows

Windows add to the character of a property – and none more so than the traditional casement window, a hinged window system that dates as far back as the 16th century.

Our designs will match the style of the original windows with slim timber sections, without compromising performance.

Security Claw

Fitted as an option on to the hinge side of the sash, these claws provide additional strength against intruder attack and offer excellent security performance.

Multipoint Locking

Multipoint locking fitted as standard - securing the window shut at several points along the length of the frame. Having multiple fixing points also helps with timber stability and in turn product life.

Internal Beading

Offering an enhanced security glazing system with all sashes glazed from the inside. Internal beading increases product performance and life expectancy. The sashes are also drained and ventilated for greater life expectancy.

Trickle Vents

Trickle vents are concealed into the frame of the window with an external timber canopy to conceal them on the outside. Colour matching is available.

Hardware

A large choice of hardware in contemporary or traditional design. Hardware available in a large range of finishes

Astragal Bars

Available in 19mm, 25mm, and 30mm options and scribed to the outer profile, offering a seamless finish. All come with corresponding spacer bars in the double glazed unit.
